## New Entry requirements to the APY Lands

### COVID-19 –Risk Management Plan

---

This Risk Management Plan template is for 'Individuals'.

#### Update

New entry requirements for the APY Lands that previously had Restricted entry to Aboriginal communities within the APY Lands under the Commonwealth Biosecurity Act 2015 has been removed.

The Australian Government had previously restricted entry to protect people in remote areas from potential exposure to COVID-19. However, despite the lifting of Commonwealth travel restrictions, people will still need a permit to enter the APY Lands and to provide declarations regarding their health, travel history and contact with people who have travelled. Entry applications to the APY Lands will be managed by the APY Permit Office.

APY require you to address each of the following THREE PARTS before considering the granting of entry permits to the APY Lands:

- **PART ONE**

**COVID-19 Record of Health Status – Individual**

- **PART TWO**

**Employers or Individuals must have an approved Risk Management Plan & Health Assessment**

- **PART THREE**

**Applicants also need to fill in an APY Permit application [permit application form](#)**

- This includes submitting a National Police Clearance check with the APY Permit Application form

**ALL PARTS ARE TO BE COMPILED AND SENT DIRECTLY TO: [permits@anangu.com.au](mailto:permits@anangu.com.au)**

#### COVID-19 Risk Management Plans

Individuals can apply for entry using this Risk Assessment template, to support their application.

In assessing your application to qualify for entry under the APY Permits will assess the risks involved and how you intend to manage or mitigate them. APY will assess the reason for entry, the work involved, the length of stay and what measures are in place to reduce the risk of introducing COVID-19 into the community. APY will need to agree, the way the activity is being engaged in will minimise the exposure to people in the designated area.

This COVID-19 Risk Management Plan template is a guide only. The intent is to assist you in developing a plan to manage risks in a way that APY will endorse. The aim of an APY COVID-19 Risk Management Plan is to identify points of contact (risks) between yourself and the people of the APY Lands, to put in place appropriate controls to minimise such exposure.
